QUESTION ONE:

1. **Read the following extract and then answer the questions that follow.**

If me and Rowley were going to open a lemonade stand, the first thing we needed were lemons. We weren't sure the exact number you were supposed to use, so we went on the high side to be safe.

The only other ingredient for lemonade beside water is sugar, but we didn't know how much we were supposed to use, either so we just eyeballed it.

I figured after we added the sugar that we were pretty much good to go, but Dad came by and told us we were doing it all wrong.

Dad gave us the correct recipe for making homemade lemonade.

HOMEMADE LEMONADE

Ingredients:

1 cup of sugar

4-6 fresh lemons

4-5 cups of water

Heatproof mixing jug

Method:

1. Place 1 cup of sugar in a heatproof mixing jug and add 1 cup of boiling water, stirring gently until the sugar dissolves.
2. Use a lemon squeezer to squeeze the juice of 4-6 lemons, enough to make a cupful.
3. Mix the sugar-water and lemon juice together in a large pitcher/ jug and add 3-4 cups of water to taste.
4. Refrigerate for 30 minutes and serve with lots of ice and slices of lemon.
